

ACRYLIC

Acrylic is available in either Epoxy or Polyurethane. Able to be used on all concrete surfaces, it comes in either matt to satin finish.

PROCEDURE

- Grind with 30 grit to desired exposure
- Grind with 60 grit to remove scratches
- Grind with 120 grit to further remove scratches
- Thorough clean
- Apply at least 2 coats of Acrylic

- Some concrete when ground requires grouting to fill up holes and imperfections in the surface. This can result in an overall better look, but is up to the client's discretion.

MAINTENANCE

May require recoating in 4-5 years time depending on whether it is in a high traffic area.

Refer to Acrylic Maintenance Sheet
